Enthusiastic software developer with a passion for learning and applying new skills. Seeking an opportunity that will provide challenges that will allow me to apply my current skills as well as acquire new ones. I am eager to contribute value and grow with a team or teams.

---

## Education Summary

### Wright State University | Computer Science
Bachelor's of Science

### Dean's List | Award
Multiple semesters

---

## Work Summary

### Personal Project | Weight Monitoring Application
Currently developing a basic application to track weight loss/gain to be used by people who wish to monitor their weight. Implementation is in Java with plans to also implement in Python and possibly as a web application using HTML, CSS and Javascript.

### Course Project | Senior Design Project
Team project which consisted of creating documentation for a product such as a requirements document as well as implementing the product. I ensured that deadlines were met and goals were achieved. Utilized Java.

### Course Project | Food Identification Application
Team project consisting of creating an Android application that used a server based artificial intelligence(AI) to determine if food is present in a photograph. I created the link between the AI and the app as well as the logic on the server side. I also lead team efforts to manage time efficiently and meet deadlines. Utilized Java and Python.
